Solar Electric Light Fund
Federal Form 990, Part III – Statement of Program Accomplishments
Year Ended December 31, 2004

52-1701564

Statement of primary exempt purpose -

- a) To raise funds both for its global operations and the application of solar-electric (photovoltaic, or PV) hardware worldwide.
- b) To coordinate and facilitate the installation of household and village-scale photovoltaic electric systems funded directly by corporations, foundations, international aid agencies, private voluntary organizations, development banks and governments.
- c) To bring cost-competitive and environmentally benign photovoltaic technology, which converts sunlight into electricity, to householders and villagers in developing countries and elsewhere, and to provide people unconnected to a national utility grid with low-cost electricity.
- d) To promote environmentally sound, sustainable development and demonstrate the advantages of decentralized solar-electric renewable energy as an alternative to central oil and coal power plants that further threaten the biosphere and contribute to global warming.
- e) To promote energy self-reliance as people lease or purchase their own solar generators from co-ops or government agencies, thereby underwriting a method of commercial or public financing through international joint-venture programs.
- f) To promote self-determination, as electric lighting allows children to read in the evening and electronic information accessed via solar-powered television and radio, means a better educated citizenry.
- g) To foster increased use and reliance on solar photovoltaic modules, long-life rechargeable storage batteries and other solar electric components by the worldwide photovoltaic industry and to assist in helping to lower the cost of solar energy.
- h) To engage in public education on domestic and worldwide energy issues and to disseminate public information regarding new and renewable sources of energy, including solar electric technologies.
- i) To promote economic development in rural areas through the utilization of income-generating applications of solar energy.
- j) To facilitate interactive links between rural areas and the outside world through solar-powered wireless communications technology.
